Summary

I'm Dipesh Arjun Shinde, a Flutter Developer with a strong focus on crafting innovative digital experiences using modern technologies. I specialize in building scalable web and mobile applications using tools like Flutter, Firebase, Appwrite, and Python. With a passion for Web3, AI, and creative design, I aim to deliver seamless and meaningful user experiences. I'm currently focused on learning full-stack web development & cyber-security, continuously expanding my skills to solve real-world problems efficiently and creatively.

Education

Viva College of Diploma Engineering and Technology

September 2022 – July 2025

Diploma in Computer Engineering

Mumbai, India

Experience

Elite Forum

June 2024 – July 2024

Mobile App Development intern

Virar, Maharashtra

- In the 6 weeks Internship Elite forum I learned about Mobile App development using Kotlin and Python, contributing to the design and development of cross-platform mobile applications.
- Gained hands-on experience with Kotlin and Python to build responsive and visually appealing user interfaces.
- Explored integration of APIs and backend services to support dynamic mobile app features.
- Enhanced understanding of mobile app development lifecycle, from UI/UX design to deployment.

Projects

The Daily Drill | Flutter, Dart, Firebase, Appwrite

March 2024

- The Daily Drill is a vibrant mobile platform built with Flutter, tailored for Implemented real-time booking and notification system using Firebase Cloud Messaging and Appwrite database triggers, enabling instant updates for service confirmations, cancellations, and reminders.
- Utilizes Firebase for real-time data storage, ensuring fast and seamless performance across devices.
- Integrates Appwrite for efficient media storage and backend services, enhancing scalability and reliability.
- Designed with a focus on smooth performance, intuitive UI, and a strong sense of community.
- Developed secure role-based authentication and dynamic UI rendering for users and service providers using Appwrite Auth and Firestore rules, ensuring personalized experiences and data access control..

Technical Skills

Languages & Framework: Flutter, Dart, Java, C, C++,Python, Kotlin

Database: MySQL, Firebase

Technologies & Developer Tools: Git & Github, Figma

Extracurricular Activities

Hackathons

Edith AI Agent Buildathon

Organized by L.R Tiwari College of Engineering & Technology

- Built and showcased an ai agent for CI/CD automation pipeline using n8n, to streamline and automate software deployment process.
